

How to add an email IMAP account on your iPhone, iPad

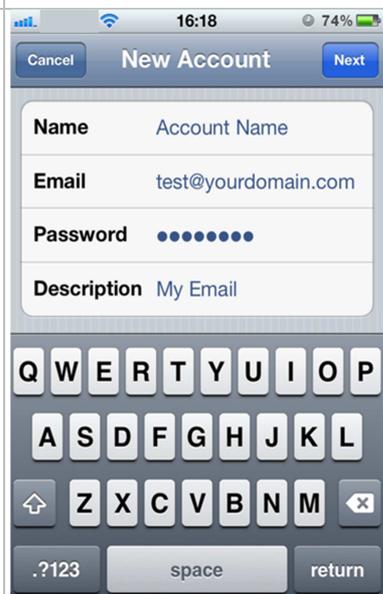

1. Tap on **Settings** on your home screen
2. Go to "**Mail, Contacts, Calendars**"

3. Tap on "**Add mail account**"

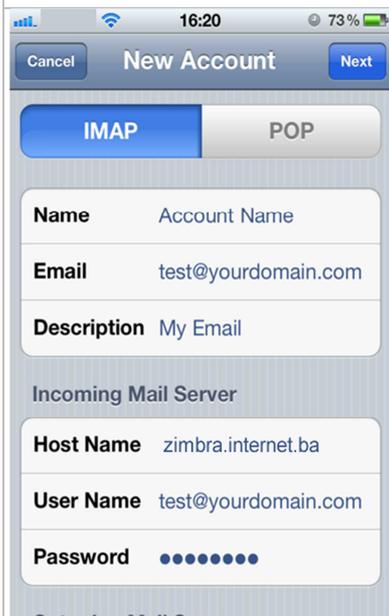

4. Select "**Other**" from the email providers list

5. Fill out the required information

Name: Your name / Vaše ime
Email: Your email address / Vaša email adresa
Password: Your email password / Vaša šifra
Description: Account description / Opis email računa

6. Tap "Next"
7. Make sure the **IMAP** account type is selected at the top

In the "**Incoming Mail Server**" section:

Host name: zimbra.internet.ba
Username: Your full email address / vaša puna email adresa

Password: Your password / vasa šifra
In the "**Outgoing Mail Server**" section:

Host name: zimbra.internet.ba
Username: Your full email address / vaša puna email adresa
Password: Your password / vaša šifra

8. Tap "Next"

9. Select where you want your emails to show

10. Tap "Save"

After the account is created you can click on the new account and check the **Advanced settings**:

Make sure the **SSL is ON**
Authentication set to Password
And the incoming **server port is 993** (IMAP port)

Please make sure that you turn **ON the SSL** and set the authentication method to "Password" for the Outgoing mail server as well.
Server port: 465
